Subject Index of Volume 36

Active carbons
the porous structure of active carbons modified with glucose pyrolysis products, 256
Alkali metals
elaboration, characterization and ionic conductivity of mixed alkali–germanium oxide thin films, 183
Alkanesulfonic acid
on the self-doping of poly[n-(3′-thienyl)alkanesulfonic acid] and poly[(3-carboxyalkyl)thiophene], 359
Alloy 600
electrochemical aspects of Alloy 600 and impurity-doped alloys in sulfuric acids, 42
Alloyed films
electrodeposition of Sr–Ti alloyed films from an aqueous bath, 236
Alloys
positron affinity of $Ga_xIn_{1-x}As$ as a function of the mole fraction, 271
Alumina
the mechanical performance of alumina as a function of grain size, 246
Aluminium
the influence of the anodization temperature and voltage on the porosity of the anodization layer on aluminium, 146
galvanic corrosion of titanium-coupled aluminium bronze, 156
microstructure and deformation behavior of a SiC whisker reinforced aluminium–lithium alloy, 217
Aluminium oxide
synthesis and structural characterization of nanocrystalline aluminium oxide, 354
Ammonium uranyl carbonate
infrared and X-ray diffraction spectra of ammonium uranyl carbonate, 241
Amorphous metallic alloys
self-diffusion of ^{58}Co in amorphous $Co_{79}Nb_{14}B_7$ during isothermal crystallization, 383
Amorphous silicon
recrystallization of amorphous silicon on insulator, 139
Amorphous solids
introduction and propagation of screw-dislocation-like defects in an amorphous Lennard-Jones solid, 68
Anisotropy
chemical pressure analysis of high temperature superconductors: anisotropic effects in $YBa_2Cu_3O_{7-x}$ and $YBa_2(Cu_{1-y}Fe_y)_3O_{7-x}$, 343
Annealing
influence of annealing on evaporated indium oxide thin films, 252
Anodization
the influence of the anodization temperature and voltage on the porosity of the anodization layer on aluminium, 146
Antimony
the effect of stacking patterns and annealing conditions on phase evolution by solid-state reactions of thin multilayered Pt/Mn/Sb films, 106
doping of GaSb single crystals, 142
Barium
characterization of the directionally solidified lamellar eutectic LiF–$LiBaF_3$, 84
surface morphology studies of Y–Ba–Cu–oxide thin films prepared by pulsed organometallic beam epitaxy, 377
Barium borate
a study on the indentation-induced cracks and mechanical behaviour of beta-barium borate single crystals, 39
Barrier potentials
studies on the grain boundary effect in polycrystalline CdTe films using optical reflectance measurements, 177
Basal planes
stress-induced preferential alignment of basal planes in phenolic-based carbon–carbon composite, 150
Bioactivity
bioactive glass-ceramic: formation, characterization and bioactivity, 294
Bismuth
effect of lead content on nonstoichiometric $Bi_{2-x}Pb_xSr_2Ca_2Cu_3O_8$ ceramic superconductors, 64
Boron
electrochemical aspects of Alloy 600 and impurity-doped alloys in sulfuric acids, 42
Bronze
galvanic corrosion of titanium-coupled aluminum bronze, 156

Cadmium
the formation, electrical conduction and catalytic behaviour of ferrospinels $Cd_{1.0-x}Co_xFe_2O_4$, $0.0 \leqslant x \leqslant 0.5$, 48
studies on the grain boundary effect in polycrystalline CdTe films using optical reflectance measurements, 177
Cadmium selenide
a simple chemical method for conversion of CdS into Ag_2S and CdSe into Ag_2Se, 119
Cadmium sulphide
a simple chemical method for conversion of CdS into Ag_2S and CdSe into Ag_2Se, 119
Carbon
improvement of carbon–silica sorbent (carbosil) surface properties upon steam activation at 1073 K, 264
Carbonate
spectrothermal studies on the decomposition course of cobalt oxysalts. Part I. Basic cobalt carbonate, 309
Carbon black
thermal effects of heat-resistant rubber composites. III. Effect of type and concentration of carbon black, 161
Carbon–carbon composites
stress-induced preferential alignment of basal planes in phenolic-based carbon–carbon composite, 150
Carbonitriding reaction
carbonitriding reaction of clay: kinetics of β'-sialon formation by means of weight loss measurement, 124
Carbosils
improvement of carbon–silica sorbent (carbosil) surface properties upon steam activation at 1073 K, 264
Catalysis
the formation, electrical conduction and catalytic behaviour of ferrospinels $Cd_{1.0-x}Co_xFe_2O_4$, $0.0 \leqslant x \leqslant 0.5$, 48

spectroscopic study of Pt/MgO catalysts prepared by the sol–gel method, 222
Ceramics
plastic shaping of ceramic superconducting discs, 129
thermal effects of heat-resistant rubber composites. III. Effect of type and concentration of carbon black, 161
the mechanical performance of alumina as a function of grain size, 246
thermal diffusivity of porous $(Ca_{1-x}Mg_x)Zr_4(PO_4)_6$ ceramic, 350
Ceramic superconductors
effect of lead content on nonstoichiometric $Bi_{2-x}Pb_ySr_2Ca_2Cu_3O_8$ ceramic superconductors, 64
plastic shaping of ceramic superconducting discs, 129
Characterization
characterization of the directionally solidified lamellar eutectic LiF–$LiBaF_3$, 84
Clay
carbonitriding reaction of clay: kinetics of β'-sialon formation by means of weight loss measurement, 124
Cobalt
the formation, electrical conduction and catalytic behaviour of ferrospinels $Cd_{1.0-x}Co_xFe_2O_4$, $0.0 \leqslant x \leqslant 0.5$, 48
effect of potential cycling on electrochemical characteristics of $Co_{58}Ni_{42}$, Co and Ni electrodeposits in base, 91
spectrothermal studies on the decomposition course of cobalt oxysalts. Part I. Basic cobalt carbonate, 309
spectrothermal studies on the decomposition course of cobalt oxysalts. Part II. Cobalt nitrate hexahydrate, 317
spectrothermal studies on the decomposition course of cobalt oxysalts. Part III. Cobalt oxalate dihydrate, 324
Colloids
effects of soxhlet extraction on the surface oxide layer of silicon nitride powders, 112
Composites
electrodeposition of nickel-vanadium pentoxide composite and its corrosion behaviour, 134
Conduction
the formation, electrical conduction and catalytic behaviour of ferrospinels $Cd_{1.0-x}Co_xFe_2O_4$, $0.0 \leqslant x \leqslant 0.5$, 48
Copper
epitaxial growth of Cu thin films on atomically cleaned (111)Si at room temperature, 170
Corrosion
electrochemical aspects of Alloy 600 and impurity-doped alloys in sulfuric acids, 42
electrodeposition of nickel-vanadium pentoxide composite and its corrosion behaviour, 134
galvanic corrosion of titanium-coupled aluminum bronze, 156
Crystallization
self-diffusion of ^{58}Co in amorphous $Co_{79}Nb_{14}B_7$ during isothermal crystallization, 383

Decomposition
spectrothermal studies on the decomposition course of cobalt oxysalts. Part I. Basic cobalt carbonate, 309
spectrothermal studies on the decomposition course of cobalt oxysalts. Part II. Cobalt nitrate hexahydrate, 317
spectrothermal studies on the decomposition course of cobalt oxysalts. Part III. Cobalt oxalate dihydrate, 324
Defects
introduction and propagation of screw-dislocation-like defects in an amorphous Lennard-Jones solid, 68
Deformation behavior
microstructure and deformation behavior of a SiC whisker reinforced aluminum–lithium alloy, 217
Diode sputtering
properties of $MoSe_2$ thin films obtained by solid state reactions between thin films and by d.c. diode sputtering, 304
Directional solidification
characterization of the directionally solidified lamellar eutectic LiF–$LiBaF_3$, 84
Dispersion-strengthening
electrodeposition of nickel-vanadium pentoxide composite and its corrosion behaviour, 134
Domain boundary
transmission electron microscopy study of domain boundaries in $PbTiO_3$, 57
Domains
studies of herringbone domain structures in lead titanate by electron back-scattering patterns, 282
Doping
doping of GaSb single crystals, 142

Effective heat of formation
evaluation of anomalies during nickel and titanium silicide formation using the effective heat of formation model, 31
Elastic stress
hydrogen transport in ferritic stainless steel under elastic stress, 231
Electroacoustics
effects of soxhlet extraction on the surface oxide layer of silicon nitride powders, 112
Electrochemical characteristics
effect of potential cycling on electrochemical characteristics of $Co_{58}Ni_{42}$, Co and Ni electrodeposits in base, 91
Electrochemistry
electrochemical aspects of Alloy 600 and impurity-doped alloys in sulfuric acids, 42
on the self-doping of poly[n-(3′-thienyl)alkanesulfonic acid] and poly[(3-carboxyalkyl)thiophene], 359
Electrodeposition
electrodeposition of nickel-vanadium pentoxide composite and its corrosion behaviour, 134
electrodeposition of Sr–Ti alloyed films from an aqueous batn, 236
Electrodeposits
effect of potential cycling on electrochemical characteristics of $Co_{58}Ni_{42}$, Co and Ni electrodeposits in base, 91
Electromigration
transmission and reflection electron microscopy of electromigration phenomena, 199
Electron back-scattering patterns
studies of herringbone domain structures in lead titanate by electron back-scattering patterns, 282
Electron microscopy
transmission electron microscopy study of domain boundaries in $PbTiO_3$, 57
Elevated temperature deformation
elevated temperature deformation behaviour of alumina-dispersed P/M copper, 371
Epilayers
recent theoretical developments in epitaxy, 1
Epitaxial growth
epitaxial growth of Cu thin films on atomically cleaned (111)Si at room temperature, 170

Epitaxy
recent theoretical developments in epitaxy, 1
Erbium
investigations of etch pits on (110) and (001) faces of flux-grown $ErFeO_3$ single crystals, 100
Etch pits
investigations of etch pits on (110) and (001) faces of flux-grown $ErFeO_3$ single crystals, 100
Europium
fluorescence spectra of Eu^{3+} ions in dual lanthanide oxyhalide powder phosphors, 194
Eutectics
characterization of the directionally solidified lamellar eutectic LiF–$LiBaF_3$, 84

Ferritic stainless steel
hydrogen transport in ferritic stainless steel under elastic stress, 231
Ferrospinels
the formation, electrical conduction and catalytic behaviour of ferrospinels $Cd_{1.0-x}Co_xFe_2O_4$, $0.0 \leqslant x \leqslant 0.5$, 48
Films
a study of the oxide layer on the surface of a TiN coating, 80
Flexural strength
bioactive glass-ceramic: formation, characterization and bioactivity, 294
Fluorescence
fluorescence spectra of Eu^{3+} ions in dual lanthanide oxyhalide powder phosphors, 194
Fracture toughness
bioactive glass-ceramic: formation, characterization and bioactivity, 294
Fringe contrast
transmission electron microscopy study of domain boundaries in $PbTiO_3$, 57

Gallium
doping of GaSb single crystals, 142
positron affinity of $Ga_xIn_{1-x}As$ as a function of the mole fraction, 271
Galvanic corrosion
galvanic corrosion of titanium-coupled aluminum bronze, 156
Germanium
elaboration, characterization and ionic conductivity of mixed alkali–germanium oxide thin films, 183
Glass-ceramics
bioactive glass-ceramic: formation, characterization and bioactivity, 294
Glucose
the porous structure of active carbons modified with glucose pyrolysis products, 256
Grain boundaries
studies on the grain boundary effect in polycrystalline CdTe films using optical reflectance measurements, 177
Grain size
the mechanical performance of alumina as a function of grain size, 246
Growth mechanism
recent theoretical developments in epitaxy, 1

Herringbone structure
studies of herringbone domain structures in lead titanate by electron back-scattering patterns, 282
High-temperature superconductors
surface morphology studies of Y–Ba–Cu–oxide thin films prepared by pulsed organometallic beam epitaxy, 377
Hulbert model
carbonitriding reaction of clay: kinetics of β'-sialon formation by means of weight loss measurement, 124
Hydrogen transport
hydrogen transport in ferritic stainless steel under elastic stress, 231
Hydrolysis
preparation of gamma-nickel oxyhydroxide through high temperature reaction of nickel with anhydrous sodium hydroxide, 190
Hydrostatic pressure
chemical pressure analysis of high temperature superconductors: anisotropic effects in $YBa_2Cu_3O_{7-x}$ and $YBa_2(Cu_{1-y}Fe_y)_3O_{7-x}$, 343

Impurity-doped alloys
electrochemical aspects of Alloy 600 and impurity-doped alloys in sulfuric acids, 42
Indentation
a study on the indentation-induced cracks and mechanical behaviour of beta-barium borate single crystals, 39
Indium
positron affinity of $Ga_xIn_{1-x}As$ as a function of the mole fraction, 271
Indium oxide
influence of annealing on evaporated indium oxide thin films, 252
Infrared spectroscopy
infrared and X-ray diffraction spectra of ammonium uranyl carbonate, 241
Interfaces
recent theoretical developments in epitaxy, 1
Ion beam mixing
the mechanical and optical properties of TiN thin films produced by ion beam mixing, 187
Ionic conductivity
elaboration, characterization and ionic conductivity of mixed alkali–germanium oxide thin films, 183
Iron
investigations of etch pits on (110) and (001) faces of flux-grown $ErFeO_3$ single crystals, 100

Lanthanide oxyhalides
fluorescence spectra of Eu^{3+} ions in dual lanthanide oxyhalide powder phosphors, 194
Lattice parameters
chemical pressure analysis of high temperature superconductors: anisotropic effects in $YBa_2Cu_3O_{7-x}$ and $YBa_2(Cu_{1-y}Fe_y)_3O_{7-x}$, 343
Lead
transmission electron microscopy study of domain boundaries in $PbTiO_3$, 57
effect of lead content on nonstoichiometric $Bi_{2-x}Pb_ySr_2Ca_2Cu_3O_8$ ceramic superconductors, 64
studies of herringbone domain structures in lead titanate by electron back-scattering patterns, 282
crystallization and microstructure study of radio frequency magnetron sputtered $PbTiO_3$ films on silicon, 337
Lennard-Jones solids
introduction and propagation of screw-dislocation-like defects in an amorphous Lennard-Jones solid, 68

Lithium
characterization of the directionally solidified lamellar eutectic LiF–$LiBaF_3$, 84
microstructure and deformation behavior of a SiC whisker reinforced aluminum–lithium alloy, 217
Luminescence
luminescence and nonlinear optical properties of perovskite-like niobates and titanates, 289

Magnesia
spectroscopic study of Pt/MgO catalysts prepared by the sol–gel method, 222
Manganese
the effect of stacking patterns and annealing conditions on phase evolution by solid-state reactions of thin multilayered Pt/Mn/Sb films, 106
Mechanical performance
the mechanical performance of alumina as a function of grain size, 246
Mechanical properties
the mechanical and optical properties of TiN thin films produced by ion beam mixing, 187
Mercury
the weakness of the adjustment of the pseudopotential form factors, 77
Metal oxide films
surface morphology studies of Y–Ba–Cu–oxide thin films prepared by pulsed organometallic beam epitaxy, 377
Microcracking
thermal diffusivity of porous $(Ca_{1-x}Mg_x)Zr_4(PO_4)_6$ ceramic, 350
Microhardness
a study on the indentation-induced cracks and mechanical behaviour of beta-barium borate single crystals, 39
Microscopy
transmission and reflection electron microscopy of electromigration phenomena, 199
Molybdenum
phase transformation study of titania in V_2O_5/TiO_2 and MoO_3/TiO_2 catalysts by X-ray diffraction analysis, 276
properties of $MoSe_2$ thin films obtained by solid state reactions between thin films and by d.c. diode sputtering, 304
Multilayered films
the effect of stacking patterns and annealing conditions on phase evolution by solid-state reactions of thin multilayered Pt/Mn/Sb films, 106

Nanocrystalline alloys
self-diffusion of ^{58}Co in amorphous $Co_{79}Nb_{14}B_7$ during isothermal crystallization, 383
Nanocrystals
synthesis and structural characterization of nanocrystalline aluminium oxide, 354
Nickel
evaluation of anomalies during nickel and titanium silicide formation using the effective heat of formation model, 31
effect of potential cycling on electrochemical characteristics of $Co_{58}Ni_{42}$, Co and Ni electrodeposits in base, 91
electrodeposition of nickel-vanadium pentoxide composite and its corrosion behaviour, 134
preparation of gamma-nickel oxyhydroxide through high temperature reaction of nickel with anhydrous sodium hydroxide, 190
Niobates
luminescence and nonlinear optical properties of perovskite-like niobates and titanates, 289
Niobium
growth and characterisation of $KTa_{0.3}Nb_{0.7}O_3$ single crystals, 174
Nitrate
spectrothermal studies on the decomposition course of cobalt oxysalts. Part II. Cobalt nitrate hexahydrate, 317
Nitride
a study of the oxide layer on the surface of a TiN coating, 80
Nonlinear optical properties
luminescence and nonlinear optical properties of perovskite-like niobates and titanates, 289
[NZP]
thermal diffusivity of porous $(Ca_{1-x}Mg_x)Zr_4(PO_4)_6$ ceramic, 350

ODS copper alloys
elevated temperature deformation behaviour of alumina-dispersed P/M copper, 371
Optical properties
the mechanical and optical properties of TiN thin films produced by ion beam mixing, 187
Oxalate
spectrothermal studies on the decomposition course of cobalt oxysalts. Part III. Cobalt oxalate dihydrate, 324
Oxides
electrodeposition of nickel-vanadium pentoxide composite and its corrosion behaviour, 134
elaboration, characterization and ionic conductivity of mixed alkali–germanium oxide thin films, 183
preparation of gamma-nickel oxyhydroxide through high temperature reaction of nickel with anhydrous sodium hydroxide, 190
Oxide films
electrodeposition of Sr–Ti alloyed films from an aqueous bath, 236
Oxide layers
a study of the oxide layer on the surface of a TiN coating, 80
the influence of the anodization temperature and voltage on the porosity of the anodization layer on aluminium, 146
Oxyhydroxide
preparation of gamma-nickel oxyhydroxide through high temperature reaction of nickel with anhydrous sodium hydroxide, 190
Oxysalts
spectrothermal studies on the decomposition course of cobalt oxysalts. Part I. Basic cobalt carbonate, 309
spectrothermal studies on the decomposition course of cobalt oxysalts. Part II. Cobalt nitrate hexahydrate, 317
spectrothermal studies on the decomposition course of cobalt oxysalts. Part III. Cobalt oxalate dihydrate, 324

P/M copper alloys
elevated temperature deformation behaviour of alumina-dispersed P/M copper, 371
Phase transformation
phase transformation study of titania in V_2O_5/TiO_2 and MoO_3/TiO_2 catalysts by X-ray diffraction analysis, 276

Phenolic-based carbon composites
stress-induced preferential alignment of basal planes in phenolic-based carbon–carbon composite, 150
Phonon conduction
thermal diffusivity of porous $(Ca_{1-x}Mg_x)Zr_4(PO_4)_6$ ceramic, 350
Phosphate glasses
thermoluminescence dosimetry of rare-earth doped tellurite phosphate glasses, 365
Phosphors
fluorescence spectra of Eu^{3+} ions in dual lanthanide oxyhalide powder phosphors, 194
Phosphorus
electrochemical aspects of Alloy 600 and impurity-doped alloys in sulfuric acids, 42
Plastic shaping
plastic shaping of ceramic superconducting discs, 129
Platinum
the effect of stacking patterns and annealing conditions on phase evolution by solid-state reactions of thin multilayered Pt/Mn/Sb films, 106
spectroscopic study of Pt/MgO catalysts prepared by the sol–gel method, 222
Polyacene quinones
infrared spectra, absorption spectra, conductivity and triplet state absorption of polyacene diquinones and their dianions, 332
Polycrystals
studies on the grain boundary effect in polycrystalline CdTe films using optical reflectance measurements, 177
Polythiophenes
on the self-doping of poly[n-(3′-thienyl)alkanesulfonic acid] and poly[(3-carboxyalkyl)thiophene], 359
Porosity
the influence of the anodization temperature and voltage on the porosity of the anodization layer on aluminium, 146
the porous structure of active carbons modified with glucose pyrolysis products, 256
Positron affinity
positron affinity of $Ga_xIn_{1-x}As$ as a function of the mole fraction, 271
Potassium
growth and characterisation of $KTa_{0.3}Nb_{0.7}O_3$ single crystals, 174
Potential cycling
effect of potential cycling on electrochemical characteristics of $Co_{58}Ni_{42}$, Co and Ni electrodeposits in base, 91
Pseudopotentials
the weakness of the adjustment of the pseudopotential form factors, 77
Pyrolysis
the porous structure of active carbons modified with glucose pyrolysis products, 256

Quinones
infrared spectra, absorption spectra, conductivity and triplet state absorption of polyacene diquinones and their dianions, 332

Radiation dosimetry
thermoluminescence dosimetry of rare-earth doped tellurite phosphate glasses, 365
Recrystallization
recrystallization of amorphous silicon on insulator, 139
Reflection electron microscopy
transmission and reflection electron microscopy of electromigration phenomena, 199
Rubber composites
thermal effects of heat-resistant rubber composites. III. Effect of type and concentration of carbon black, 161

Screw dislocations
introduction and propagation of screw-dislocation-like defects in an amorphous Lennard-Jones solid, 68
Selenium
the weakness of the adjustment of the pseudopotential form factors, 77
properties of $MoSe_2$ thin films obtained by solid state reactions between thin films and by d.c. diode sputtering, 304
Self-diffusion
self-diffusion of ^{58}Co in amorphous $Co_{79}Nb_{14}B_7$ during isothermal crystallization, 383
Self-doping
on the self-doping of poly[n-(3′-thienyl)alkanesulfonic acid] and poly[(3-carboxyalkyl)thiophene], 359
Semiconductors
the weakness of the adjustment of the pseudopotential form factors, 77
a simple chemical method for conversion of CdS into Ag_2S and CdSe into Ag_2Se, 119
recrystallization of amorphous silicon on insulator, 139
Shear bands
elevated temperature deformation behaviour of alumina-dispersed P/M copper, 371
Sialon formation
carbonitriding reaction of clay: kinetics of β'-sialon formation by means of weight loss measurement, 124
SiC whiskers
microstructure and deformation behavior of a SiC whisker reinforced aluminum–lithium alloy, 217
Silica
improvement of carbon–silica sorbent (carbosil) surface properties upon steam activation at 1073 K, 264
Silicides
evaluation of anomalies during nickel and titanium silicide formation using the effective heat of formation model, 31
Silicon
evaluation of anomalies during nickel and titanium silicide formation using the effective heat of formation model, 31
epitaxial growth of Cu thin films on atomically cleaned (111)Si at room temperature, 170
Silicon nitride
effects of soxhlet extraction on the surface oxide layer of silicon nitride powders, 112
Silicon on insulator (SOI)
recrystallization of amorphous silicon on insulator, 139
Silver selenide
a simple chemical method for conversion of CdS into Ag_2S and CdSe into Ag_2Se, 119
Silver sulphide
a simple chemical method for conversion of CdS into Ag_2S and CdSe into Ag_2Se, 119
Single crystals
a study on the indentation-induced cracks and mechanical behaviour of beta-barium borate single crystals, 39
investigations of etch pits on (110) and (001) faces of flux-grown $ErFeO_3$ single crystals, 100

doping of GaSb single crystals, 142
growth and characterisation of $KTa_{0.3}Nb_{0.7}O_3$ single crystals, 174
Sodium hydroxide
preparation of gamma-nickel oxyhydroxide through high temperature reaction of nickel with anhydrous sodium hydroxide, 190
Sol–gel
spectroscopic study of Pt/MgO catalysts prepared by the sol–gel method, 222
Solid-state reactions
the effect of stacking patterns and annealing conditions on phase evolution by solid-state reactions of thin multilayered Pt/Mn/Sb films, 106
properties of $MoSe_2$ thin films obtained by solid state reactions between thin films and by d.c. diode sputtering, 304
Sorbents
improvement of carbon–silica sorbent (carbosil) surface properties upon steam activation at 1073 K, 264
Soxhlet extraction
effects of soxhlet extraction on the surface oxide layer of silicon nitride powders, 112
Spectroscopy
infrared and X-ray diffraction spectra of ammonium uranyl carbonate, 241
Spectrothermal analysis
spectrothermal studies on the decomposition course of cobalt oxysalts. Part I. Basic cobalt carbonate, 309
spectrothermal studies on the decomposition course of cobalt oxysalts. Part II. Cobalt nitrate hexahydrate, 317
spectrothermal studies on the decomposition course of cobalt oxysalts. Part III. Cobalt oxalate dihydrate, 324
Sputtering
properties of $MoSe_2$ thin films obtained by solid state reactions between thin films and by d.c. diode sputtering, 304
crystallization and microstructure study of radio frequency magnetron sputtered $PbTiO_3$ films on silicon, 337
Stainless steel
hydrogen transport in ferritic stainless steel under elastic stress, 231
Stress-induced alignment
stress-induced preferential alignment of basal planes in phenolic-based carbon–carbon composite, 150
Strontium
electrodeposition of Sr–Ti alloyed films from an aqueous bath, 236
Sulfuric acid
electrochemical aspects of Alloy 600 and impurity-doped alloys in sulfuric acids, 42
Superconductivity
chemical pressure analysis of high temperature superconductors: anisotropic effects in $YBa_2Cu_3O_{7-x}$ and $YBa_2(Cu_{1-y}Fe_y)_3O_{7-x}$, 343
Superconductors
effect of lead content on nonstoichiometric $Bi_{2-x}Pb_xSr_2Ca_2Cu_3O_8$ ceramic superconductors, 64
plastic shaping of ceramic superconducting discs, 129
Surface analysis
a study of the oxide layer on the surface of a TiN coating, 80
Surface chemistry
effects of soxhlet extraction on the surface oxide layer of silicon nitride powders, 112
Surface cracking
bioactive glass-ceramic: formation, characterization and bioactivity, 294
Surface properties
improvement of carbon–silica sorbent (carbosil) surface properties upon steam activation at 1073 K, 264

Tantalum
growth and characterisation of $KTa_{0.3}Nb_{0.7}O_3$ single crystals, 174
Tellurium
the weakness of the adjustment of the pseudopotential form factors, 77
studies on the grain boundary effect in polycrystalline CdTe films using optical reflectance measurements, 177
Thermal diffusivity
thermal diffusivity of porous $(Ca_{1-x}Mg_x)Zr_4(PO_4)_6$ ceramic, 350
Thermoluminescence
thermoluminescence dosimetry of rare-earth doped tellurite phosphate glasses, 365
Thin epitaxial films
recent theoretical developments in epitaxy, 1
Thin films
the effect of stacking patterns and annealing conditions on phase evolution by solid-state reactions of thin multilayered Pt/Mn/Sb films, 106
a simple chemical method for conversion of CdS into Ag_2S and CdSe into Ag_2Se, 119
epitaxial growth of Cu thin films on atomically cleaned (111)Si at room temperature, 170
elaboration, characterization and ionic conductivity of mixed alkali–germanium oxide thin films, 183
the mechanical and optical properties of TiN thin films produced by ion beam mixing, 187
influence of annealing on evaporated indium oxide thin films, 252
properties of $MoSe_2$ thin films obtained by solid state reactions between thin films and by d.c. diode sputtering, 304
crystallization and microstructure study of radio frequency magnetron sputtered $PbTiO_3$ films on silicon, 337
Titanates
transmission electron microscopy study of domain boundaries in $PbTiO_3$, 57
luminescence and nonlinear optical properties of perovskite-like niobates and titanates, 289
Titania
phase transformation study of titania in V_2O_5/TiO_2 and MoO_3/TiO_2 catalysts by X-ray diffraction analysis, 276
Titanium
evaluation of anomalies during nickel and titanium silicide formation using the effective heat of formation model, 31
galvanic corrosion of titanium-coupled aluminum bronze, 156
electrodeposition of Sr–Ti alloyed films from an aqueous bath, 236
studies of herringbone domain structures in lead titanate by electron back-scattering patterns, 282
crystallization and microstructure study of radio frequency magnetron sputtered $PbTiO_3$ films on silicon, 337
Titanium nitride
a study of the oxide layer on the surface of a TiN coating, 80

the mechanical and optical properties of TiN thin films produced by ion beam mixing, 187
Toughness
a study on the indentation-induced cracks and mechanical behaviour of beta-barium borate single crystals, 39
Transmission electron microscopy
transmission and reflection electron microscopy of electromigration phenomena, 199
Trap states
studies on the grain boundary effect in polycrystalline CdTe films using optical reflectance measurements, 177
Triplet states
infrared spectra, absorption spectra, conductivity and triplet state absorption of polyacene diquinones and their dianions, 332

Uranium
infrared and X-ray diffraction spectra of ammonium uranyl carbonate, 241

Vanadium
electrodeposition of nickel-vanadium pentoxide composite and its corrosion behaviour, 134
phase transformation study of titania in V_2O_5/TiO_2 and MoO_3/TiO_2 catalysts by X-ray diffraction analysis, 276

Weight loss
carbonitriding reaction of clay: kinetics of β'-sialon formation by means of weight loss measurement, 124

X-ray diffraction
infrared and X-ray diffraction spectra of ammonium uranyl carbonate, 241
phase transformation study of titania in V_2O_5/TiO_2 and MoO_3/TiO_2 catalysts by X-ray diffraction analysis,276

Yttrium
surface morphology studies of Y–Ba–Cu–oxide thin films prepared by pulsed organometallic beam epitaxy, 377
